

- ★ Many US veterans suffer from serious oral health conditions that pose additional risks to their overall health.
- ★ Due to benefit limitations, only 10% of veterans receive dental care through the VA.
- ★ Dental Lifeline Network (DLN) matches veterans who are elderly, disabled, or medically-fragile with volunteer dentists and labs who provide treatment at no cost.
- ★ DLN's *Lifeline Heroes Challenge* (LHC) rallies financial support to coordinate care for more veterans with nowhere else to turn.

Dental Lifeline Network has transformed the lives of more than 173,000 people, including thousands of veterans, through a national community of 12,000+ volunteer dentists, specialists, and dental labs.

Last year, nearly 700 veterans across the U.S. received over **\$2.27 million** in donated dental treatment.

Your Partnership Changes Lives!

- ★ 4,864 veterans have received treatment through DDS since 1985.
- ★ This care represents an impressive \$28.1 million in donated dental services.
- ★ On average, each veteran benefits from \$5,824 worth of dental care, including complex procedures such as extractions, dentures, and implants
- ★ Despite this success, the need for care remains critical. Currently, 222 veterans have been referred for treatment but are still waiting for care due to the growing demand.

You can help veterans like Anthony and Charlene.

"Thank you for everything that you have done for me and how you have made such a difference in my life,"

US Army veteran, Anthony, received \$15,867 in care from volunteer Dr. Basses.

"I am just so happy I could cry. Thank you so much. God bless your heart."

US Army veteran, Charlene, received over \$3,506 in care from DLN volunteer, Dr Diane Tedder.
