

Partner Impact Highlights

SUMMER 2026

THE IMPACT OF YOUR SUPPORT

Your partnership does more than provide vital support to Dental Lifeline Network's Donated Dental Services (DDS) program; it restores the dignity and oral health of vulnerable individuals who have nowhere else to turn for help. Our vision is for all adults to have access to lifechanging dental care.

“

“Working with Frank and Earline was a wonderful experience as my first patients through Dental Lifeline Network. I was happy to give my services back to members of my community who I knew would benefit the most.”

Dr. Luke Eliopoulos
DDS Volunteer

”

Anthony's Story

Unable to afford dental care on his military pension, Army veteran Anthony suffered for years with severe tooth decay and broken dentures held together by super glue. A team of dedicated DDS volunteers, including Dr. Saad Bassas, provided him with the comprehensive dental treatment he needed. Now, Anthony is pain-free, can eat comfortably, and face the world without shame.

Frank and Earline's Story

Faced with deteriorating oral health and limited income, Frank and Earline spent years enduring constant pain and difficulty eating. Their struggles ended when DDS volunteer Dr. Luke Eliopoulos worked with a volunteer lab to provide both of them with lifechanging dental care. Today, the couple is living pain-free, enjoying dates at their favorite restaurants, and smiling with renewed health and confidence.

“

“We're both healthier now because of our teeth and the treatment we received through the DDS program,” shared Earline.
